By equal, we mean equal in length of time. The space created by two bar lines is called either a Measure or a Bar. In jazz, classical, or rock music, either term is acceptable and interchangeable. Bar lines go all the way through the staff. On the grand staff, the bar lines go through the entire staff.

### **Music Notation and Theory for Intelligent Beginners**

theory, because it uses the phrase *tohu va bohu* to describe the results of a judgment. Leading gap theorists like Arthur Custance used this fact to assert that "without form and void"™ must mean "laid waste by a judgment"™. But this is fallacious "there is nothing in the Hebrew words *tohu va bohu* themselves to suggest that.

Perhaps the most famous problem in graph theory concerns map coloring: Given a map of some countries, how many colors are required to color the map so that countries sharing a border get different colors? It was long conjectured that any map could be colored with four colors, and this was finally proved in 1976. Here is an example of a small
