Proportional-Integral-Derivative PID Controls

Proportional representation (PR) characterizes electoral systems in which divisions in an electorate are reflected proportionately in the elected body. If $n\%$ of the electorate support a particular political party, then roughly $n\%$ of seats will be won by that party. The essence of such systems is that all votes contribute to the result - not just a plurality, or a bare majority.

Proportional representation - Wikipedia

In control engineering, a state-space representation is a mathematical model of a physical system as a set of input, output and state variables related by first-order differential equations or difference equations. State variables are variables whose values evolve through time in a way that depends on the values they have at any given time and also depends on the externally imposed values of ...
