

representing modeling and visualizing pdf

In 3D computer graphics, 3D modeling is the process of developing a mathematical representation of any surface of an object (either inanimate or living) in three dimensions via specialized software. The product is called a 3D model. Someone who works with 3D models may be referred to as a 3D artist. It can be displayed as a two-dimensional image through a process called 3D rendering or used in a ...

3D modeling - Wikipedia

This series on visualizing microservices continues with a look into microservice architecture with examples of context mapping and identifying bounded contexts.

Visualizing Microservices: Designing a Microservice System

A data model (or datamodel) is an abstract model that organizes elements of data and standardizes how they relate to one another and to properties of the real world entities. For instance, a data model may specify that the data element representing a car be composed of a number of other elements which, in turn, represent the color and size of the car and define its owner.

Data model - Wikipedia

The downward-sloping yellow line is a demand curve, and the upward-sloping green line is a supply curve. Hopefully that seems familiar. However, we're in a bit of a mirror universe, because we are graphing the supply and demand of expenditure. So the "expenditure suppliers", represented by the green curve, are economic consumers.

This article discusses the value of modeling in the context of software development. It examines the basics of what motivates the practice of modeling software and explains the benefits and values that this practice can offer.

The value of modeling - IBM

The volume of data has grown exponentially over the past decade, to the point where the management of the data asset by traditional means is no longer possible. As shown in Fig. 1, big data trends have been enabled by advances in computing technologies, which facilitated the sudden explosion of data from various sources such as the Web, social media, and sensors.

Big data technologies and Management: What conceptual

2019 is a critical year, the "last chance" for the international community to take effective action on climate change, General Assembly President Maria Espinosa said on Thursday, during a briefing to announce the UN's roadmap to the Climate Summit in September.
