Agile software development is an approach to software development under which requirements and solutions evolve through the collaborative effort of self-organizing and cross-functional teams and their customer(s)/end user(s). It advocates adaptive planning, evolutionary development, empirical knowledge, and continual improvement, and it encourages rapid and flexible response to change.

Self-organization is a fundamental concept in agile project management. The Agile Manifesto includes the principle, "The best architectures, requirements, and designs emerge from self-organizing teams." Yet a common misconception about agile project management approaches is that because of this ...
