The purpose of a written information security and privacy policy is to demonstrate the organization's commitment to information security and privacy. The policy therefore not only should be approved by the highest-level leadership possible but must be communicated and practiced from the top.

### **Information Security and Privacy Best Practices**

First, companies should build security into their devices at the outset, rather than as an afterthought. As part of the security by design process, companies should consider: (1) conducting a privacy or security risk assessment; (2) minimizing the data they collect and retain; and (3) testing their security measures before launching their products.
