clinical observation, that self-cutters exhibit a marked obsessional trait. (2) To examine the possible relationship between self mutilation, obsessionalism and narcissism. The above relationships were suggested by the impression that self-cutters, although often casually dressed and made up, had clearly spent much time and effort achieving this effect.

including ritual self-harm, unintentional self-harm, and deliberate self-harm. Ritual self harm includes acts which occur within a set of shared cultural or religious beliefs, within which they take a particular significance or meaning. A distant Western relative of this is the fashion for body piercing and adornment with studs and rings.

lay the foundation for a more exhaustive report on blood sacrifice among the ancient Maya. In this first essay we will focus our attention on rituals of self-mutilation and auto-sacrifice and pay particular attention to the Maya practice of drawing sacrificial blood from the male genital organs. I will argue that Maya art contains a significant-

Self-harm, self-injury, and self-mutilation are often used interchangeably. Some researchers have categorized self-mutilation as a form of self-injury. Self-injury is characterized as any sort of self-harm that involves inflicting injury or pain on one's own body. In addition to self-mutilation, examples of self-injury include: hair
