To behaviorists, social skills are learned behaviors that allow people to achieve social reinforcement. According to Schneider & Byrne (1985), who conducted a meta-analysis of social skills training procedures (51 studies), operant conditioning procedures for training social skills had the largest effect size, followed by modeling, coaching, and social cognitive techniques.

Contextual learning is based on a constructivist theory of teaching and learning. [page needed] Learning takes place when teachers are able to present information in a way that students are able to construct meaning based on their own experiences. Contextual learning experiences include internships, service learning, and study abroad programs, among others.
