type, and soil and rock types and their distributions.. .. As described in Case Histories 1 and 5, the next step in the medium scale survey may be to have the area flown so as to define rock outcrops, soil zones, faults, dykes and zones of moisture using infra-red imagery. This technique is most efficient where the soil cover is thin (Warwick et al, 1979).

Weathering, Parent Materials & Soil Genesis Pedogenesis (soil formation) is a complex process that does not follow a linear path of development. While some soils do form in place, most soils form in mineral or organic substrates (parent materials) that have been displaced from their source of origin.
